Digital Learning Designer
Level 5

LDN Digital Learning Designer Apprentices will learn and understand how to analyse, design, develop, implement and evaluate digital learning programmes. They will work in education and corporate settings and could be responsible for the design of professional development programmes, courses, and other learning types of learning. The apprenticeship focuses on best practice and research-informed approaches to how humans learn. It also covers how this knowledge can be leveraged with appropriate learning technologies.

Course Content

- The Digital Learning Profession
- Analysis and Planning for Digital Learning Design Projects
- Theory and Methodology of Digital Learning Design
- Developing Digital Media and Spaces for Learning
- Quality and Enhancement of Digital Learning Practices

Programme

- Level 5 Apprenticeship Standard
- On Programme Period: 15 months
- End Point Assessment: 4 months
- Funding Band: £16,000

End Point Assessment

The End Point Assessment for this apprenticeship consists of two assessment methods:
AM1: Work-based project and presentation
AM2: Portfolio of evidence and professional discussion
